Liquid Solutions: "Two Degrees Celsius + Water" was a success with over 70 participants. Most found it a 'sobering' event - check out the forum's 8 take aways. With so much talk of risk, we thought it's time for solutions! This month we asked some experts to share their experiences in harvesting the low-hanging fruits of water efficiency gains: pipe expert Pure Technologies on non-revenue water, AECOM on harvesting rainwater using cities as catchments and Energenz on how water audits could result in water earnings. Sometimes simple solutions are the best. Thinking out of the box works too... Global Water Intelligence expands on why there could be streams of gold int he water-for-mining sector.
