EDITORIAL

Is desalination a solution for China's water crisis? This month, we review trends & opportunities in this market, discuss policy issues with the Secretary General of China's Desalination Association and Amnon Levy, COO of IDE Tech shares his insights on desal technology and the challenges ahead.

It has now been two weeks since we went live and the fact that we have been presenting and participating/moderating in panel discussions on water risks at events hosted by global banks shows how important water risks are to the economy. Some of the more interesting discussion threads are covered in our last highlight "Food for Thought."

LATEST FEATURES

Desal in China: Trends and Opportunities

China Water Risk reviews China's desalination market - it's past and future.
