

Barclays – Tsinghua University China Water Summit

Thursday 22nd March 2018

Lecture Hall, Department of Hydraulic Engineering, Tsinghua University Campus

12:00 – 13:30 **Registration and Buffet Lunch**

13:30 – 13:45 **Welcome Remarks**

Prof. Yuan Si – Vice President of Tsinghua University Council

Mr. Theodore Roosevelt IV – Chairman, Barclays, Cleantech Initiative

13:45 – 14:25 **Keynote Presentation: Water Resources, Development, and Ecosystem Protection in China**

Protecting the environment has emerged as a leading issue in China amidst the country's rapid growth and urbanization. The government's commitment to improved environmental conditions was a part of China's 19th Party Congress. Our keynote session will include a conversation on China's environmental and clean water challenges and goals with a leading authority in the topic.

Presenter:

- Dr. Wang Hao – *Director, China Institute of Water Resources and Hydropower Research (IWHR)*

14:25 – 15:05 **Industrial Solutions to China's Water Challenge**

New technologies and operational excellence can drive efficiency and savings in the infrastructure space in China. This panel will include a conversation with some of the leading water treatment technology, engineering and operation companies that are at the forefront of developing and implementing solutions to meet the needs in China and abroad.

Panellists:

- Mr. Chen Chunsheng – *Vice President, Beijing OriginWater*
- Mr. Luo Junling – *CFO, China Everbright Water*
- Mr. Wang Shuangcheng – *General Manager (China), IDE Technologies*
- Mr. Yang Dan - *Director, General Manager and Deputy Secretary of CPC in Water Operation Company of China Gezhouba (Group) Corporation*

Moderator:

- Prof. Ni Guangheng - *Tsinghua University Professor*

15:05 – 15:20 **Break**

15:20 – 16:00

Innovative Financial Solutions for Water Projects

Market forces present an important tool for solving the water challenge, and also offer compelling investment opportunities considering the underlying water supply and demand trends. This panel will include insights from Barclays professionals and institutional investors on new financial solutions for water infrastructure challenges.

Panellists:

- *Mr. Sudipto Sakar – Practice Manager, Water Global Practice, World Bank Group*
- *Mr. Daniel Shemie – Director of Water Funds, The Nature Conservancy*
- *Mr. Philippe Rohner – The Water Fund Co-Manager, Pictet*
- *Ms. Debra Tan – Director, China Water Risk*

Moderator:

- *Mr. Zachary Sadow – Energy Analyst, Barclays Investment Bank*

16:00 – 16:40

Closing Panel: China's International Water Challenges and Opportunities

China has made substantial foreign direct investments in various regions where water scarcity is also an issue. How can the country learn from its own water, technology, and infrastructure development experiences to become a leader abroad.

Panellists:

- *Professor Upmanu Lall – Director of the Columbia Water Center, Columbia University*
- *Ms Li Lailai – Director, World Resources Institute*
- *Professor Ni Guangheng - Professor, Department of Hydraulic Engineering, Tsinghua University*
- *Ms. Debra Tan – Director, China Water Risk*
- *Professor Zhao Jianshi – Professor, Department of Hydraulic Engineering, Tsinghua University*

Moderator:

- *Mr. Theodore Roosevelt IV – Chairman, Barclays Clean Tech Initiative*

16:40 – 16:50

Closing Remarks
